

# LUMBARD DIES; NOTED DOCTOR

---

**Specialist in Anæsthetics  
Was 77 Years Old.**

---

Dr. Joseph E. Lumbard, pioneer in anæsthesia and inventor of several instruments internationally used in medicine, died yesterday at his home, 447 Fort Washington avenue, at the age of 77.

He was born in Acushnet, Mass., on July 25, 1865. On his father's side he was a descendant of Thomas Lombard, who settled in Massachusetts in 1630, and of William White, who came to America in the Mayflower. On his mother's side he was a descendant of John Alden of Plymouth Colony.

Dr. Lumbard studied medicine at the University of Vermont, from which he was graduated in 1889. He served internships at Knickerbocker and Lying-in hospitals in New York city. He was for many years associated with the Harlem and Lutheran hospitals.

He was one of the first physicians to specialize in anæsthesia and subsequently taught anæsthesia at the University Medical College and at Fordham. Among the instruments he invented for use in connection with his specialty was Lumbard's airway. He was a former president of the National Anæsthetists Society, of the Harlem Medical Association, the New York Society of Anæsthetists and the Valentine Mott Society. He was a member of the Academy of Medicine and of the Medical Society of New York.

He is survived by two sons, J. Edward Lumbard Jr. of New York and George S. Lumbard of Springfield, Mass., and a daughter, Mrs. W. Ogden Johnson of Bronxville.
